PROFESSIONAL SUMMARY

Backend engineer building APIs, transaction services and AI-enabled healthcare applications. Works with Python, TypeScript and PHP across payments, hospital workflows and business operations. Experience includes live client delivery, LLM and vision integrations, and development spanning backend services, mobile apps and administration tools.

TECHNICAL SKILLS

Languages and APIs: Python, TypeScript, PHP, FastAPI, Fastify, Express, Laravel

Data and messaging: PostgreSQL, MySQL, Redis, SQLAlchemy, Prisma, RabbitMQ

Applied AI: Gemini, LangChain, RAG, FAISS, Whisper, vision APIs

Engineering tools: Docker, Git, GitHub Actions, pytest, Jest, Linux

PROFESSIONAL EXPERIENCE

Aedion AI

Aug 2026 - Present

AI Engineer / Lead Backend Developer

Full-time from August 2026; collaborated from May 2026.

- Develop FastAPI services for healthcare chat, scan and transcription workflows, integrating LLM and vision APIs.
- Improve scan validation, image-quality feedback, severity handling and structured responses across the inference flow.
- Build React Native eye-capture modules for eye detection, cropping and preflight checks with actionable retake guidance.
- Contribute to V2 chatbot architecture for retrieval, provider fallbacks, conversation context and audit components.

Elixir hospital platform

2026

Freelance Software Developer

- Extended an existing PHP and MySQL hospital platform with patient mobile workflows, wallet integration and interface improvements.
- Built React Native and Expo interfaces for records and appointments, alongside AI-assisted features for the clinical platform.

ToksNet

Oct 2025 - Jul 2026

AI Engineer / Lead Backend Developer

- Developed healthcare backend and AI integrations using Python, FastAPI and model APIs.
- Extended Elixir with maternity workflows, interface improvements and AI-assisted patient-record features using PHP, MySQL and Docker.

Osemwegie Eghosa Ephraim

Backend and Applied AI Engineer

SELECTED PROJECTS

GiftyView

giftyview.com

Freelance client delivery | Live with real users and transactions

Flutter, Dart, React, TypeScript

- Built the consumer app, administration portal and web experience for gift-card, bill-payment and wallet journeys.
- Integrated platform APIs and transaction flows; guided and contributed to backend integration alongside the backend developer.

MiAuditOps

Freelance client delivery | Built from scratch to handoff

React, TypeScript, Express, Drizzle, SQL

- Built an audit and inventory application covering tenant access, stock movements, reconciliation, reporting and administration.
- Implemented ledger posting and recalculation, subscription entitlements and Paystack billing before client handoff.

ADDITIONAL EXPERIENCE

SenatraxAI | Freelance Backend Engineer | BODI — Jun 2026

- Built core and transaction services with TypeScript, Fastify, Prisma and PostgreSQL, including identity verification, payment webhooks and admin controls.

Sosotoba Institute of Technology | Backend Developer — Mar 2024 - Sep 2025

- Developed PHP and Laravel hospital features, maintained MySQL workflows and wrote backend tests.

Tryve Technologies | Junior Software Developer — Jun 2022 - Jul 2023

- Built client web features and API integrations using PHP, Laravel, Python and Node.js with TypeScript.

EDUCATION AND CERTIFICATION

B.Eng Computer Engineering | University of Benin | Jul 2024

Full Stack Web Developer Certification | ALX Africa | Feb 2023
