PROFESSIONAL SUMMARY

Frontend engineer building React web applications and React Native and Flutter mobile interfaces. Delivered GiftyView's consumer app, administration portal and web experience; contributed dashboard features to AfroRave. Works from Figma designs through responsive implementation, API integration and device-specific interactions.

TECHNICAL SKILLS

Web interfaces: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Mobile interfaces: React Native, Expo, Flutter, Dart, camera capture

State and APIs: Zustand, TanStack Query, REST APIs, forms, authentication

Product delivery: Figma implementation, responsive layouts, Git, PHP integration

PROFESSIONAL EXPERIENCE

Aedion AI

Aug 2026 - Present

AI Engineer / Lead Backend Developer

Full-time from August 2026; collaborated from May 2026.

- Build React Native eye-capture interfaces with on-device detection, framing feedback and eye-region cropping.
- Implement focus, lighting and eye-presence checks that explain capture failures and guide users through retakes.
- Connect camera interactions to scan APIs and use capture-quality tools to investigate poor image inputs.

Elixir hospital platform

2026

Freelance Software Developer

- Built React Native and Expo patient interfaces for appointments, records and wallet journeys, connected to PHP and MySQL services.
- Extended an existing hospital platform with interface improvements, mobile workflows and AI-assisted features.

ToksNet

Oct 2025 - Jul 2026

AI Engineer / Lead Backend Developer

- Redesigned parts of the existing Elixir hospital interface and extended maternity workflows using its PHP and MySQL backend.
- Delivered healthcare application features across user interfaces, API integration and AI-assisted patient-record workflows.

Osemwegie Eghosa Ephraim

Frontend Engineer

SELECTED PROJECTS

GiftyView

giftyview.com

Freelance client delivery | Live with real users and transactions

Flutter, Dart, React, TypeScript

- Built the consumer app, administration portal and web experience for gift-card, bill-payment and wallet journeys.
- Integrated platform APIs and transaction flows; guided and contributed to backend integration alongside the backend developer.

AfroRave

Team contribution | Creator and vendor interfaces

React, TypeScript, TanStack Query, Zustand

- Implemented dashboard features from Figma, including signup flows, profile and settings modals, slot views and responsive layouts.
- Connected organiser-event selection and settings to API data; added event filters and a creator guide, and fixed mobile navigation.

EduSmart

Original school product | Onboarding two schools

PHP, CodeIgniter, MySQL, JavaScript

- Built school administration interfaces and workflows for student records, fees, attendance, staff and reporting.
- Connected screens to PHP and MySQL services and prepared school-specific configurations while onboarding two schools.

ADDITIONAL EXPERIENCE

SenatraxAI | Freelance Backend Engineer | BODI — Jun 2026

- Built core and transaction services with TypeScript, Fastify, Prisma and PostgreSQL, including identity verification, payment webhooks and admin controls.

Sosotoba Institute of Technology | Backend Developer — Mar 2024 - Sep 2025

- Developed PHP and Laravel hospital features, maintained MySQL workflows and wrote backend tests.

Tryve Technologies | Junior Software Developer — Jun 2022 - Jul 2023

- Built client web features and API integrations using PHP, Laravel, Python and Node.js with TypeScript.

EDUCATION AND CERTIFICATION

B.Eng Computer Engineering | University of Benin | Jul 2024

Full Stack Web Developer Certification | ALX Africa | Feb 2023
