PROFESSIONAL SUMMARY

Mobile engineer building React Native, Expo and Flutter apps with supporting backend services. Delivered GiftyView's consumer app and companion interfaces for a live payments product. Additional work covers patient apps, offline synchronisation, speech processing and camera capture connected to healthcare APIs.

TECHNICAL SKILLS

Mobile development: React Native, Expo, TypeScript, Flutter, Dart, Expo Router

Device and app features: SQLite, Zustand, biometrics, push notifications, audio, camera

Backend and data: FastAPI, Node.js, PHP, Supabase, PostgreSQL, PostGIS, MySQL

Integration and testing: Offline sync, payment APIs, Whisper, Git, Docker, Jest, pytest

PROFESSIONAL EXPERIENCE

Aedion AI

Aug 2026 - Present

AI Engineer / Lead Backend Developer

Full-time from August 2026; collaborated from May 2026.

- Build React Native camera modules with eye detection, region cropping and lighting, focus and eye-presence checks.
- Connect capture feedback and retake guidance to scan APIs; develop regression checks and capture-quality measurement tools.
- Develop FastAPI healthcare chat, scan and transcription services and contribute to V2 chatbot architecture.

Elixir hospital platform

2026

Freelance Software Developer

- Built a React Native and Expo patient app for appointments, records and wallet journeys, connected to existing hospital services.
- Implemented biometric sign-in, protected session storage and payment-return handling, integrating with a PHP and MySQL backend.

ToksNet

Oct 2025 - Jul 2026

AI Engineer / Lead Backend Developer

- Developed healthcare backend and AI integrations using Python, FastAPI and model APIs.
- Extended Elixir with maternity workflows, interface improvements and AI-assisted patient-record features using PHP, MySQL and Docker.

Mobile Full Stack Engineer

SELECTED PROJECTS

GiftyView

giftyview.com

Freelance client delivery | Live with real users and transactions

Flutter, Dart, React, TypeScript

- Built the Flutter consumer app, admin portal and web experience, including wallet journeys, biometric sign-in and push notifications.
- Integrated payment and transaction APIs; guided and contributed to backend integration alongside the backend developer.

PipeUp

github.com/Ghost-tech-ng/Loquor

Personal product | Working build in testing

React Native, Expo, TypeScript, Supabase

- Built audio recording, timestamped transcription and local practice history, with pace, filler and pause metrics derived from word timestamps.
- Implemented Supabase functions for authenticated transcription, AI coaching, quotas and subscription entitlements, with a React admin portal.

HarvestLink

Personal product | Working prototype or pilot

React Native, Expo, SQLite, FastAPI, PostGIS

- Built an offline field-agent app for registration and consent capture, with SQLite drafts, queued submissions and retry handling.
- Implemented registry and sync APIs with role-based access, idempotent submissions and geometry validation, plus an operations web interface.

ADDITIONAL EXPERIENCE

SenatraxAI | Freelance Backend Engineer | BODI — Jun 2026

- Built core and transaction services with TypeScript, Fastify, Prisma and PostgreSQL, including identity verification, payment webhooks and admin controls.

Sosotoba Institute of Technology | Backend Developer — Mar 2024 - Sep 2025

- Developed PHP and Laravel hospital features, maintained MySQL workflows and wrote backend tests.

Tryve Technologies | Junior Software Developer — Jun 2022 - Jul 2023

- Built client web features and API integrations using PHP, Laravel, Python and Node.js with TypeScript.

EDUCATION AND CERTIFICATION

B.Eng Computer Engineering | University of Benin | Jul 2024

Full Stack Web Developer Certification | ALX Africa | Feb 2023
